

Ag Drone Summit

May 18th Neodesha, KS

Sponsored by AgEagle

Making Ag Drones Pay for Themselves

Ag drones can be profitable

Drones are no longer toys but tools used in precision agriculture.

Fly for profit!

“Agricultural drones can be profitable if the user understands how they add value”

Our Speaker:

Herb Dowse from the Iowa Corn Belt knows aerial imagery; but most important, he knows how it can profit farmers and service providers.

Learn from his experiences.

Topics covered

- Who will pay for drone services
- What type of imagery will customers buy
- What will customers hope to gain from the aerial images
- How drone service can help sell other services
- How to analysis aerial data with [SMS by AgLeader](#)
- How to manage aerial data
- Flying for hire legally – FAA paperwork, Earning FAA
